BESPOKE DIGITAL CAMPUS PROTOTYPE

Modernizing The Olive Branches Schools: Cloud Portal & Student AI Innovation

Presented to: **Mrs. Oyinkansola Morohunfoluwa Omigbodun** (Proprietress & Executive Director) & **Arc. Oyegoke Akinrinola Omigbodun** (Chairman, Board of Trustees)

🚀 The 12-Hour Feat & Live Prototype

Over the past weekend, Amazoe Solutions architected and deployed a production-grade, bespoke digital campus exclusively for The Olive Branches Schools in **less than 12 hours** using advanced Agentic AI workflows. The live system is fully functional right now at: **https://school-portal-os.vercel.app**

1. The Vision: From Legacy WordPress to a High-Speed Cloud Campus

The Olive Branches Schools have built an enviable legacy anchored on *Isaiah 8:18* and academic excellence—from National Olympiad gold to historic visits by Nobel Laureate Prof. Wole Soyinka. However, the school's current public website (built on legacy WordPress) carries technical debt:

Current Limitations on Live Site

- 253KB unoptimized HTML + 31 external script tags causing slow mobile loading.
- Third-party redirection to `obs.softedu.info` lacking unified school branding.
- Zero direct tuition payment integration.
- Results and reports disconnected from instant mobile clearance.

Amazoe Solutions Upgraded Architecture

- Global Edge CDN delivery with **0.6-second** sub-second load times.
- Unified Single-Sign-On Student & Parent Portal.
- Instant Paystack payment with QR-verifiable bursary clearance receipts.
- 24/7 "Olive AI" parent assistant answering in English, Yoruba, and French.

2. Eliminating the Bank Teller Hustle (For Parents, Teachers & Bursars)

💳 Say Goodbye to Bank Queues & Paper Tellers

In typical Nigerian private schools, term resumption means parents queuing up under the sun in bank branches to fill pink/yellow paper deposit slips, bringing tellers to the school bursar, and teachers spending days cross-referencing bank statements. **Our Paystack Integration completely eliminates this:** Parents pay securely in 30 seconds via Card, Bank Transfer, or USSD from home. The portal automatically reconciles the bursary ledger in real-time and issues an Official Stamped Clearance Receipt. Neither parents nor teachers ever have to visit a bank branch!

3. Student AI & Creative Coding Bootcamp (Next Week Launch)

If cutting-edge AI allowed a software engineer to build an entire enterprise school portal in under 12 hours, imagine the creative potential unlocked when your students are taught these exact same engineering skills.

🎓 2-Day Practical Hands-On Workshop: "Young Innovators AI & Web Engineering Lab"

Target Audience: Junior Secondary (JSS 1 - 3) and Senior Secondary (SSS 1 - 3) students.
Proposed Timeline: Scheduled for **Next Week** (Mid-Term or Weekend Intensive).
Curriculum: Prompt Engineering, Building Interactive Web Apps with AI, Logical Thinking, and Digital Safety.

📽️ The Official YouTube Channel Synergy (@OliveBranchesSchoolsOsogbo)

We will professionally record and produce video highlights of the students actively prompting AI and building real web applications during the bootcamp. These videos will be uploaded directly to the school's official YouTube channel:

1. Viral Admissions Publicity
Parents in Osun State and beyond will be amazed seeing 13- and 15-year-old Olive Branches students building live software. This delivers unmatched word-of-mouth marketing for enrollment.

2. Direct School Revenue & Sponsorships
Educational AI videos on YouTube drive high engagement, qualifying the school's channel for creator ad revenue, corporate STEM sponsorships, and international tech grants.

4. Comprehensive Hidden Upgrades on the New Portal

Portal Feature	The Problem on Legacy Sites	The Amazoe Modern Solution
Student Result Privacy	Results publicly visible or vulnerable on weak scripts.	**Encrypted Access Gate:** Requires Student Reg ID + PIN. Strictly compliant with student data privacy.
Teacher CA Gradebook	Teachers manually fill separate paper sheets and Excel files prone to errors.	**In-App Teacher Suite:** Input 1st CA (20), 2nd CA (20) and Exam (60) with instant total % and letter grade auto-calculation.
CBT Examination Clinic	Paying recurring fees to third-party test platforms (testfrika).	**Native CBT Simulator:** Timed practice tests for WAEC, JAMB, and Cambridge with instant answer evaluation.
Official Bursary Receipt	Handwritten paper carbon receipts that get lost.	**Digital Clearance Slip:** Green circular verification stamp, itemized fee breakdown, and dual email + physical bursary collection fallback.

5. Flexible Engagement Packages

We offer two clear pathways so the school management can begin immediately without bureaucratic delays:

OPTION A: Student AI Bootcamp

IMMEDIATE LAUNCH

Host the 2-Day Practical AI & Web Engineering Bootcamp next week.

- Flat School Facilitation: ~~₦350,000~~ OR
- Per-Student Enrollment: ~~₦15,000~~ (with 20% revenue share back to the school)
- Includes video production for school YouTube channel.

OPTION B: Full Cloud Portal Migration

ANNUAL ENTERPRISE

Complete migration from old WordPress to the custom Cloud Portal.

- Paystack automated payment setup & testing.
- Student and staff database migration.
- 48-Hour DNS cutover without downtime.
- Full staff training and dedicated tech support.

🎯 Immediate Next Step: 15-Minute Virtual Demo

We invite the Proprietress, Chairman, and Management Board to a 15-minute live screen-share (via Google Meet, Zoom, or WhatsApp Video) where we will demonstrate the Paystack checkout, the confidential result checker, and the teacher gradebook in action.
